Forecast for Wednesday 02 Jun 2021

Weather: A dry and fine morning, however cloud will increase from the south and west from mid-morning with the increasing threat of showers moving slowly north and east across the Brecon Beacons during the afternoon, these could be locally heavy with the risk of thunder. The showers should ease from the early evening leaving the area cloudy.

Chance of cloud free mountain/hill tops above 600m: 100% reducing to 70% during the afternoon.

Visibility: Very good with excellent air clarity, however cloud will increase from mid morning but bases should stay above the summits, however developing showers are likely to result in the sudden deterioration of visibilities from late morning.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels are likely to be high during sunny spells, so sun protection is recommended if you plan to spend much of the day in the mountains. Showers from late morning with the risk of thunder are likely to make walking conditions challenging at times.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 01 Jun 2021	0mm	0mm	0mm

Forecast for Thursday 03 Jun 2021

Weather: A cloudy start to the day, however cloud should gradually thin and break up a little during the course of the late morning. Sunny spells during the afternoon, perhaps with an odd isolated shower. Cooler than recent days.

Maximum wind: Southwesterly 10-15 mph, gusting 25 mph near summits and ridges.

Chance of cloud free mountain/hill tops above 600m: 30% increasing to 70% from late morning.

Visibility: Generally moderate visibilities during the morning and with cloud bases near 400 to 500m, visibilities are likely to be poor near summits. With cloud bases lifting during the late morning and early afternoon, visibilities should markedly improve becoming generally good if not very good by the evening.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 17 Celsius.
At 600m: Plus 7 Celsius rising to plus 14 Celsius.
Freezing level: Above summits.
